

DIRECTOR OF CENTRAL INTELLIGENCE
Security Committee

SECOM-D-016

11 January 1980

Note for Chairman SECOM:

1. There is concern in [] Collection Tasking element (COMIREX and SIGINT Committees) over responsibility set forth in the new [] manual. STATINTL

2. [] has proposed a fix, copy attached, that followed one we had already cranked into the revision of the Manual. A copy of that is attached. STATINTL

3. I don't like [] revision because it perpetuates the myth that SECOM is good for only technical advice and offers potential for significant reduction in the role SECOM should play in the [] program. STATINTL

4. If you agree with our fix then your equities in all aspects will be protected and you will have an opportunity to discuss major points as they arise in the course of implementation. STATINTL

[] STATINTL
